

## Microspersion® 214VF-50

A water based dispersion of micronized oxidized synthetic wax for rub resistance and improved surface slip

### Features and Benefits

- Convenient, ready-to-use, pourable water based wax dispersion
- Imparts a high degree of lubricity
- Lowers COF
- Improves rub resistance
- Economical alternative to polyethylene waxes

### Dry Wax ID

Aquawax 214VF

### Recommended Addition Levels

2.0-5.0% (on total formula weight)

### Systems and Applications

Water based coatings. Industrial coatings (including plastic and metal); stains, sealers and varnishes; wood coatings; printing inks and OPV's (including flexo and gravure).

### Typical Properties\*

	<u>Microspersion 214VF-50</u>
Wax Solids	50%
Viscosity @ 25 °C (cP)	3,000 - 4,000
pH	7.0 - 8.0
Density @ 25 °C (g/cc)	0.97
Wax Mean Particle Size (µm)	5.0 - 7.5
NPIRI Grind	3.0 - 4.0
