

### Microspersion® EZ-2

A synergistic blend of surfactants ideal for making waterbased wax dispersions

#### Features and Benefits

- Improved stability vs. Microspersion EZ
- Use 4% Microspersion EZ-2 with (optionally) a defoamer to disperse up to 50% wax solids
- HLB of 8.7
- 40CFR Part 180 compliant for seed and agricultural systems
- For maximum wax dispersion storage stability, post-add a thickening agent to increase viscosity and slow wax flotation
- Refer to our brochure and video on "How to Disperse Micronized Wax" for complete use instructions

#### Recommended Addition Levels

4% (on total formula weight)

#### Systems and Applications

Waterbased wax dispersions

#### Typical Properties\*

##### Microspersion EZ-2

<b>Appearance</b>	Clear Liquid
<b>Viscosity @ 25 ° C (cP)</b>	< 500
<b>pH</b>	7.0 - 9.0
<b>Density @ 25 ° C (g/cc)</b>	0.99
<b>Active Content</b>	92.5%
